

TAI on Zoom: What you need to know

All TAI services and programs for the High Holidays, except for the two Tashlich events, will be online via Zoom. **If you will be joining us on Zoom for the first time**, you must register in advance; see the second bullet item for registration information. **If you registered previously** to watch Shabbat services on Zoom and still have that link, it will work for the High Holidays. If you no longer have access to that link, you must register again.

- Go to **<https://zoom.us/>** and download the application appropriate to your device. You may use Zoom on a phone, tablet or desktop. On occasion, we will create small group discussions in “breakout rooms,” and we would love for you to participate with video and audio if you are able and inclined. Use the device that allows you the most versatility while joining services.
- All services can be accessed by clicking (or typing into your browser) **[Bit.ly/ZoomTAI](https://bit.ly/ZoomTAI)**. You will be prompted to register with your name and email address. We also will ask you if you are a member of the temple. Non-members are welcome. We are just trying to dissuade anyone with less than joyous intent from joining our services. Once you have registered, you will receive an individualized link to join services. You may use that link to access any TAI Zoom service. You will be added to our list and will receive reminder emails with your link included at least one hour before every service. Complete this action any time before services.
- We will be online at least 30 minutes before all services for informal social time and to assist you with your technology, should you need the help. You also may call or email **Lauren Hill at (859) 396-6286 or lhil4646@gmail.com** to set up an appointment for personalized assistance. You also might wish to visit the Zoom support page at **<https://support.zoom.us/hc/en-us/articles/206175806>** for answers to frequently asked questions. If you are new to Zoom, allow plenty of time for unexpected delays.
